PROJECTS

PowerBI Projects

Visualizing Covid cases using Power BI

Processed data from .json and .csv files with a size of over 35Mb, and visualized the data into two dashboards using Power BI as the main tool.

Link project: [\[REDACTED\]](#)

SQL Projects

Build Data Warehouse

Used a database on pets to build a suitable data warehouse, performed ETL for the database using SQL server and Visual Studio to complete the project.

Link project: [\[REDACTED\]](#)

Python Projects

Visualizing Covid cases using Python

Used Python to collect and analyze data and then visualize the analyzed data.
